

Tissue Mania

Materials Needed:

- * 1 Sheet of [Fadeless® Board](#) or [Peacock™ Railroad Board](#) (Any Color)
- * 4 sheets of [Madras Pattern Tissue](#)
- * 1 [Honeycomb Pad](#)
- * 1 Package [Assorted DecoPuffs™](#)
- * Glue (spray glue and white glue)
- * Pencil

Instructions:

- 1. Create A Background:** Lay out the piece of board either horizontally or vertically. Spray entire board with spray adhesive and carefully lay down the 4 pieces of Mandras Tissue for your background color.
- 2. Start The Flower:** Cut a 1/2 circle in the honey comb pad to create the center of the flower and glue it in the top 1/3 of the board.
- 3. Make It Grow:** Pull out the colors you want your flower to be in the assorted pack of DecoPuffs. Cut the DecoPuffs into quarters. Start by wrapping a square of tissue paper around a pencil at the eraser end. Dot glue on the end and glue it to the paper. Continue this process until the flower is as big as you want it.
- 4. Finish It:** To complete the flower glue some grass colored rolls flat on the paper at the bottom and full size decopuffs for the stem and leaf.
