

# Paper Lanterns

## Needed Supplies:

•12 X 18 sheet of [Peacock® Construction Paper](#)

•[Trait-tex® Yarn](#)

\* Tape

\* Hole Puncher

## Instructions:

1.Lay construction paper vertically. Fold bottom left corner to top edge. Take bottom right corner to meet first fold. #1

2.Unfold both corners.

3.Fold top left corner down to bottom edge and fold top right corner to meet first fold. Unfold both corners. #2

4.Fold corners in half from point to point. #3

5.Unfold both corners.

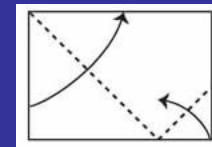

6.Fold corners from point to point on opposite side and then unfold. #4

7.Continue folding corners at half way points throughout the entire sheet. When finished folding, turn the sheet over. #5,6,7

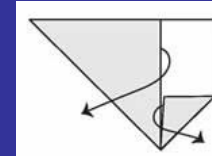

8.Make horizontal creases at all intersections. The folding is now complete. Bend the sheet of paper around so the diagonal folds pop out. #8

9.When you have the lantern shape formed, tape the inside to hold the lantern together.

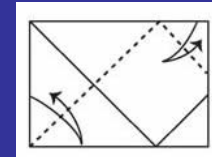

10.With a hole puncher, punch two sides opposite of each other and tie yarn through the holes.
